

Archive Readers

Mini, Midi & Maxi

Real

The REAL Archive Reader (AR) range of fiche readers has been designed to offer economic and simple viewing of microform images in both jacket and fiche format. With the optional 16/35mm manual carrier both 16mm and 35mm open spool roll film can

also be viewed.

The REAL readers offer trouble-free operation, sturdy plastic construction and an innovative optics system for unmatched image clarity. They are also very light and compact whilst being

attractively and originally finished in matt black. All three readers have single lens facility only, to ensure that they are competitively priced but the interchangeable lens design allows for easy lens changing to view different types of microfilm.

Standard Features

- ❖ **Floating Lens System** - for consistent focusing over entire film area
- ❖ **Drive-Belt Focusing** - for razor sharp images
- ❖ **Simple Design** - for maximum reliability
- ❖ **Rugged Construction** - for optimum durability
- ❖ **Compact and Lightweight** - for space saving and portability
- ❖ **Fanless Convection Cooling** - for silent operation
- ❖ **Interchangeable Lens Capacity** - for viewing different microform types

◀ Archive Reader - AR Mini

The AR Mini is a compact, lightweight unit that allows you to view both COM and source-document images at 75% of their original size. At just 356mm high and 4.5kg this is one of the smallest readers available.

Screen size: 273mm (W) x 210mm (H).

Screen colour: blue.

Unit size: 314mm (W) x 381mm (D) x 356mm (H).
