

Staude digi-fiche

The conversion system – digital to analog

Invest in this unique safety and cost-effective long-term storage medium safeguarding the future.

The Staude digi-fiche fully and automatically converts your digital data to micro fiche.

The roll film used is a high quality 105 mm microfilm, specially optimized for our system. The micro cut-film is automatically be cut from the 60 m film roll and is exposed with data and title (company's logo, three line text, fiche number) and is afterwards automatically processed. The micro fiches remain readable for hundreds of years, when properly processed (by using the special Staude film-chem-kit) and stored under controlled conditions.

Latest electronics, sophisticated mechanics and chemistry especially developed for this system result in a high quality standard.

Digital and analog archiving

Staude digi-fiche

While you are working with your digital data in familiar environments, the Staude digi-fiche facilitates long-term storage of your data.

The Staude digi-fiche handles nearly all digital formats (up to A3 images) and can be adapted to your existing archive.

The Staude digi-fiche is a perfect partner for your long-term archive. Create the microfiches directly after scanning or import your digital documents, which have been already stored on any storage medium, by means of the archiving software.

You have your digital documents in your network !

No problem – the Staude digi-fiche is prepared for use in networks. A fully automatic guardian scans each image transaction in the network and induces the archiving in case of need.

Technical Data

- Fully automatic conversion, digital to analog
- Input:
All raster-image files i.e. TIFF, PCX, GIF, JPEG, SGI, CALS, Adobe Photoshop etc., A4 format
- Output:
105 mm fiche with 98 exposures
- Complete workplace, including Windows workstation
- Processing speed: up to 2500 images per hour
- Title input variable
- Processing unit integrated
- Existing data on different storage media can be processed in the same way as current images in an active workflow
- Dimensions D/W/H cm: 95/132/110 (without workstation)

Options

- Index
- Exposure of coordinates
- Various grids

We offer custom-made archiving solutions, proven logistics and a reliable service.
