# GENUS
## PROVIDING ACCESS TO YOUR INFORMATION

**IRISPowerscan**

The most powerful, easy-to-use **production scanning** and **OCR** solution supporting most popular **high-speed scanners!**

Do you need to increase your **scanning productivity?**
Do you need fast and reliable document indexation?
Do you need to **convert scanned images** into **searchable PDF** or editable text e.g. Microsoft Word?
Are you looking for a professional scanning and OCR application with **no volume limitation** and that **can meet your budget** requirements?
If so, find out more about IRISPowerscan™ and how it can meet your most specific scanning and OCR needs...
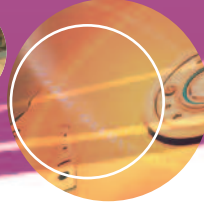

## Key Benefits

- The most productive scanning, indexing and OCR solution in one product!
- Creation of hyper compressed colour searchable PDF output files UNLIMITED!
- Full text OCR UNLIMITED!
- Easy project/template import from Kodak Capture Software - 6.x application
- No scanning volume limitation!
- Completely integrated workflow: scanning, indexing, quality control and validation, OCR processing
- Simply manage your scanning, indexing and batching process at once
- Eliminate pre-sorting of documents
- Display more than 8 scanned images at a time for easy and fast verification
- Enjoy flexible indexing and image enhancement features
- Easy-to-use solution with a very intuitive user interface
- Supports most popular high-speed scanners (Kodak, Fujitsu, Canon, etc.)
- Import into IRISPowerscan™ any type of document already scanned and archived on your system
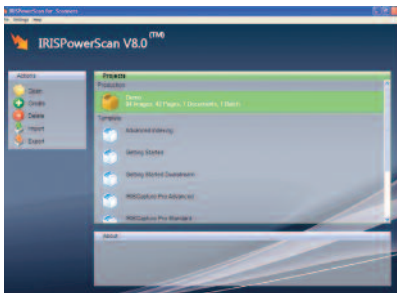

**IRISPowerscan™** is the first solution to combine high-speed scanning with indexing and character recognition features. It is fast, reliable, user-friendly, compatible with any brand of scanners... and affordable!

## Key Features

- Multistream scanning (colour, B&W, greyscale)

- Multi-image display

- Image pre-processing features (deskew, cropping and blank page detection, etc.)

- Pre-defined set of image parameter templates

- Full support of VirtualReScan

- Easy image manipulation and editing features (rescan, rotate, split & merge, etc.)

- Batch and document separation features through Barcodes, OCR zones, blank pages, layout, etc.

- Automatic document renaming through barcodes values, layout identification or OCR/ICR zones

- Easy indexing of your documents through barcodes, OCR/ICR zones or using OCR on-the-fly

- Advanced automatic sorting of documents through barcodes, patchcodes and OCR/ICR

- Powerful banking font recognition (OCR-A1 Alphanumeric, Eurobanking and Numeric, OCR-B1 Alphanumeric, Eurobanking and Numeric, E-13B Optical and CMC7)
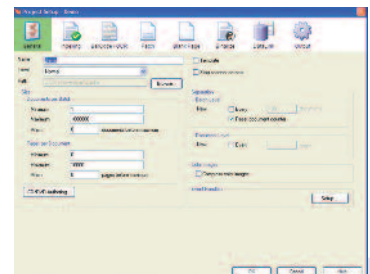

### With predefined templates to help you start scanning at a production level:

IRISPowerscan™ is delivered with numerous predefined templates in order to speed your workflow. These predefined templates include typical settings for common sorting, indexing and processing tasks. With IRISPowerscan™, start scanning at a production level in a few clicks!
If none of the predefined templates matches your needs, you can very easily create your own workflow projects as well. These projects will be saved in the IRISPowerscan™ start page.
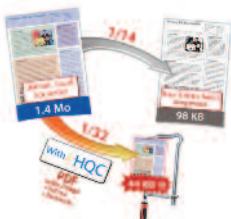

## Compatible with any scanner:

IRISPowerscan™ supports any brand of scanners: Kodak, Canon, Hewlett-Packard, Avision, Fujitsu, Epson, Panasonic, Bell + Howell and many more. Simply choose the scanner you want to use with IRISPowerscan™ in the list or select the « Generic Twain Driver mode ».

## Intelligent High Quality Compression

I.R.I.S. iHQC™ add-on (Patent Pending) represents the best technology to convert your documents into highly-compressed colour PDF files with searchable text without conceding on quality! iHQC™ basic compression level, called Level Good Quality, is included unlimited in IRISPdf™ and you can also enjoy the best compression levels in limited volumes (1.000 documents/year). As the iHQC™ technology is sold as an add-on, prices are based on the volumes of documents you want to process with this new technology (an unlimited version also exists).
